

Comp Unit RCP, AIR WHL GAS 3000PSI

NSN: 4310-01-764-2316

LIN: E70817

TM: Varies upon Make/Model

System Description

The compressor is mounted on a 2-wheeled trailer powered by a 2 cylinder, 4 cycle, air cooled gas engine. The output is normal air pressure at 4 cubic feet per minute at 3,000 pounds per square inch and weighs 250 pounds.

System Mission

The compressor provides the soldier in the field compressed air to inflate tires and to operate a variety of pneumatic tools and equipment used mainly by vehicle maintenance shops and individual units.

This system is not currently in reset.

Reset Type

Reset Work (Field Level) - Work performed to correct equipment faults that are performed at the ORG/DS level; performed by unit level soldiers, augmented by contractor as required.

Reset Strategy

The last procurement of this LIN was in 1969. There is no overhaul or repair program for these compressors. All of these compressors have exceeded the 10 year life span; therefore, there is no Maintenance Expenditure Limit (MEL). If the compressor is in condition code A or B then this Command will respond to a report of excess to redistribute it. If the compressor is in any other condition code then this Command will reply to send it to the local DRMO for disposal. These compressors do not qualify for any manufacturers' warranties. To order the compressor access the supply system with a Milstrip requisition.
